

Carolina Pure Water Systems -
Water that is good for you...
A system that is good
for the environment.

The Dental-Pure System For Dental Offices

- Safe for all autoclaves, handpieces, dental units, high-tech dental equipment and clean water bottles
- Makes 12 to 15 gallons of distilled grade water a day
- Green product, with no plastic bottles disposed in landfill
- Endless flow of distilled grade water to your dental office
- Reduces costly maintenance of dental equipment and handpieces
- Eliminates time and hassle of buying distilled water
- ADA and CDC compliant

Our dental water purification systems produce high quality water. This water is distilled quality, zero (000) TDS, non-corrosive quality water for use in virtually all types of autoclaves as well as other dental equipment that requires high quality water such as clean water bottle systems, ultrasonic scalers, sonic scaler handpieces, and ultrasonic cleaning units.
